Step 2

Clean the source. The first remedy for skunk smell is to clean the source. This part gets a little difficult. However, the best course of action is to work on neutralizing and cleaning the smell. If it is you, jump in the shower and start there. If it is the [dog](#), then start with a mix of one quart peroxide and 1/4 cup of baking soda with two teaspoons of liquid dish soap in it. This is safe for your dog and will help clean the smell out of the fur. If you have a [large dog](#), you will need to make a larger batch. Wet down the dog, scrub the mix as deeply as you can into the fur (avoiding the eyes, nose and mouth) and let sit for about five minutes. Rinse clean with lots of water. For fabrics, use 1 cup baking soda, 1 cup vinegar, and the standard amount of laundry detergent. Line drying can also help as the sun will aid in getting rid of smells and fresh air is always good. You can also clean your car to try and get rid of the smell there.

Step 3

Air it all out. The next remedy for skunk smell is to let it breathe and air it out. You may find that fresh air can be a lot of help. It is always a good idea to air it all out in this case and let that fresh air come in. You may find that you smell it every now and again. This is because we can smell even the smallest amount of it.

Step 4

Repeat washing. If you still smell skunk odor after the above steps, repeat washing the source. This can be done in a similar manner or with just detergent if you wish. Make sure you clean as deeply as possible.

If a skunk has sprayed you, your pet, your car, or your house, you will undoubtedly be asking yourself, "How do I get rid of this smell!" It isn't an easy task, but skunk smell can be removed. It may take a few trials and you may have to work to get rid of it, but you can indeed learn how to get rid of skunk smell. If this is a common problem in your area, and you constantly need to remove skunk smell then I strongly suggest you pick up a copy of [Eliminate Skunk Odor](#) - this guide has great tips on skunk [odor removal](#), and if you or your pet is coated in skunk scent you'll want to have the best possible advice close at hand! These skunk odor removal tips will help you learn how to get rid of skunk smell.

Step 1

Remove the source of the odor. If your pet has been sprayed with skunk scent, then don't let him in the house until you have gotten rid of the odor. If you do let him or her in the house, you will have to work on getting the smell out of the house. If it is you that has been sprayed, then carefully go in without touching a bunch of things. If your house itself is where the skunk sprayed, then try and get the things that have been damaged out of the

Step 5

Change the air filter on the furnace and/or the air conditioner. You may find that you are still smelling it and that is because small amounts are stuck in the air filter of your furnace or air conditioner. You can remove this by changing that filter which will stop the filter from recirculating that smell back into the house.

Now you know how to remove skunk smell. With time and effort, you should be able to be free of skunk odor within a week or two. With larger pets, this may be a little harder, but it can be done.

APR

21 My retriever was sprayed by a skunk last week and it was a complete disaster. Now I want to contribute and help other people faced with the same situation.

After the skunk sprayed, my poor dog ran into the house jumps on my couch and then ran into my bedroom and hid in my closet. I threw a large [blanket](#) over her wrapped her up and put her in my car and rushed her to the veterinarian.

After dropping her off, I relies that the car and whole house was saturated with the skunk smell. All my clothes in my closet including my shoes smelled like skunk. I was in a panic and did not know what to do so I called the vet to see if she had any suggestions on getting rid of the residual odors in the house. She recommended Biocide Systems Room Shocker and informed me that it was the only thing that will effectively remove residue skunk odors from the home car and even clothing. I had my doubts but since they had a money back guarantee I didn't have much to lose and a lot to gain. So I went online and purchase several units. I put one unit in my closet with all my clothing.

The rest I place throughout the house and one unit in my car. WOW!!! She was absolutely right!! My [home](#) may car and even my clothing was restored within 12 hours after receiving the Room Shocker. Just amazing!! It's a new product so you can only get it on the Biocide Systems website. www.biocidesystems.com the product works so well that it comes with a money back guarantee.

If you find yourself faced with similar problem, this product will save you time, grief and money.

Sincerely,
Gina Stanly
